

Cyprus Property Price Index Q3 2020 Prices as at 30/09/20

This is the forty-second publication of RICS' Cyprus Property Price Index, a quarterly price and rental index which is based on methodology produced by the University of Reading, UK. The Index tracks property and rental prices across all districts and main property types.

Across Cyprus, residential prices for both houses and apartments increased on a quarterly basis by 0.64% and 0.85% respectively, with the biggest increases being in Paphos, 2.75% for houses and 2.51% for apartments.

Values for holiday homes on a quarterly basis across Cyprus increased by 0.64% for apartments and decreased by -1.25% for houses. Larnaca showed the largest quarterly increase for holiday apartments at 3.7% whereas Limassol showed the largest quarterly decrease for holidays houses at -2.34%.

Across Cyprus, on an annual basis, prices decreased by -0.1% for apartments, -0.6% for houses, -5.5% for retail, -1.4% for offices and -5.8% for warehouses.

Introduction & Commentary

During the third quarter of 2020, the Cyprus economy began to rebound compared to the previous quarter, with a seasonally adjusted quarterly GDP change of 8.9% but there was still an annual decline with an annual seasonally adjusted GDP change of -4.7%. The seasonal rebound is likely due to Cyprus 'reopening' after a nationwide quarantine lockdown that was lifted on 21 May 2020, yet the effects of COVID-19 are still apparent when viewing the annual statistics.

The number of registered contracts of sale increased by 70% from the previous quarter and decreased by -21% compared to previous seasonal year. The number properties sold to foreigners (Non-EU) with registered contracts of sale increased by 6% compared to the previous quarter, and compared to the previous seasonal year the number of contracts of sale decreased by -35.9%. The issue of NPLs and DFAS by most banks continues to be present in the market.

Market Capital Values

The Property Price Index has recorded overall decreases on an annual basis. Paphos and Limassol recorded decreases in all asset classes, whereas other cities vary, with residential assets remaining the most stable and office, retail and warehouse assets mostly showing an annual decrease.

Index parameters and methodology

Methodology

The methodology underpinning the RICS Cyprus Property Price Index was developed by the University of Reading, UK. The report is available upon request at ricscyprus@rics.org

Coverage and Variables Monitored

The RICS Cyprus Property Price Index monitors the urban centres of Nicosia, Limassol, Larnaca, Paphos and Paralimni-Famagusta. The Index only tracks prices in Republic of Cyprus' government controlled area and not in the occupied North.

In each of these centres, the index monitors the Market Value and Market Rent, as defined in the RICS Red Book, across the four main property sectors – office (CBD), retail (high street), industrial (warehouse) and residential (houses and apartments).

Recognising that there are sub-districts within these urban areas which operate and behave in a varying manner, a number of these is monitored in order to derive the composite index for each category per urban area.

The information provided in this publication is based on the average price and rent of the sub-districts monitored per urban centre per sector. The complete list of these sub-districts can be found in the University of Reading's report which is available upon request at ricscyprus@rics.org

Nature of Notional Buildings

The RICS Cyprus Property Price Index monitors hypothetical or notional buildings, each having specific characteristics. Details of these hypothetical properties are provided in the University of Reading's report.

The provided price per sqm is based on the Gross External Area of the property (as defined in the RICS' Code of Measurement Practice 8th Edition), which includes the living area and covered verandas but excludes common areas.

Frequency

The index is produced on a quarterly basis.

Monitoring Process

The estimation of price levels is carried out by accredited RICS property professionals who are active in the relevant markets.

Contributing professional bodies

Profile of RICS

RICS is a global professional body. We promote and enforce the highest professional qualification and standards in the development and management of land, real estate, construction and infrastructure. Our name promises the consistent delivery of standards – bringing confidence to the markets we serve. The work of our professionals creates a safer world: we are proud of our profession's reputation and we guard it fiercely. RICS in Europe is based in Brussels and represents 17 national associations, with over 8,150 members in Continental Europe. Visit www.rics.org for more information.

Profile of ΣΕΕΟΚΚ

The Cyprus Association of Quantity Surveyors and Construction Economists (ΣΕΕΟΚΚ) is the association that represents Chartered Quantity Surveyors and Quantity Surveyors whose main area of work is in Cyprus and they permanently live in Cyprus. Visit www.seeokk.org for more information.

Profile of Cyprus Association of Valuers and Property Consultants

The Association was founded in 1972. At present there are about 100 members registered with the Association and concurrently with the Cyprus Scientific and Technical Chamber (CSTC), which is the official body that regulates the Valuation Profession in Cyprus. Our members are also members of RICS and are operating in accordance with the International Valuation Standards and the RICS Appraisal and Valuation Manual (Red Book).
